Video submission:

Guidelines on Video presentation

+ Submission date: 14 Feb 2023 (2359)

- Target audience: members of the general public
- What to include in your video:
 1. **Introduce yourself**: State your full name. Instead of reciting your project title, consider explaining your project in a single sentence.
 2. **Explain your project**: summarize your research into main points:
 - a. What did you do?
 - b. What did you find?
 - c. What conclusions did you draw?
 3. ***What did you learn from this research experience?*** (Do not forget to include this!)
- Good practices when filming
 - Film yourself in a well-lit and non-distracting environment
 - Speak clearly & loudly so that the recording is able to pick up every word
 - Avoid long pauses.
 - Listen to your video after recording to ensure your voice is clear and audible, and that the video has not picked up too much background noise.

Enjoy the process!
